

Steps to make an electronic signature on an Adobe PDF form

1 If you do not already have a digital ID, select:

I want to sign this document using

A new digital ID I want to create now.

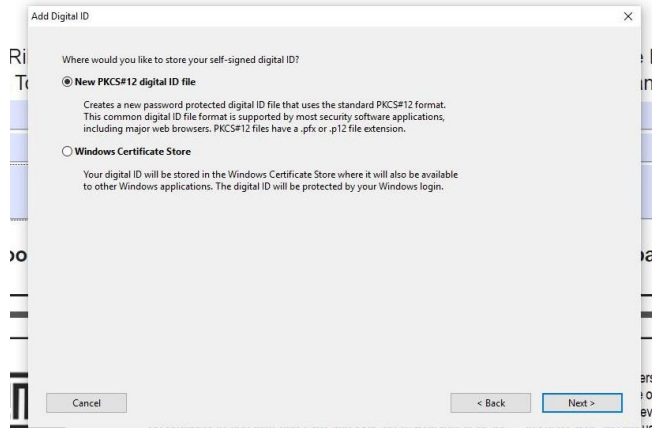

2 If using a Windows computer, you will be asked to store your self-signed digital ID as either:

New PKCS#12 digital ID

or

Windows Certificate

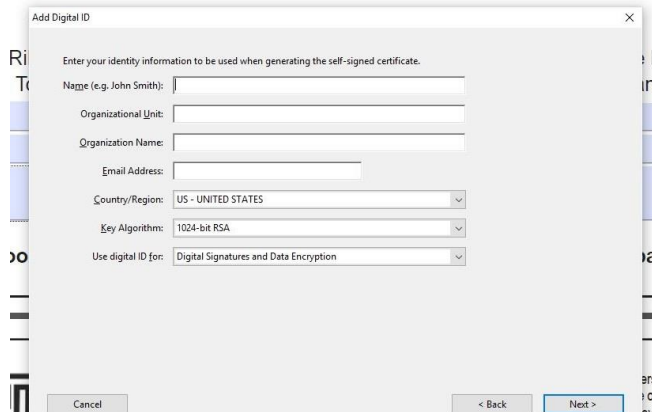

You can safely choose either one. If you are using an Apple computer, you won't see this step.

3 Complete your identity as appropriate.

You can omit **Organizational Unit** and **Organization Name**.

Leave the **Key Algorithm** and **Use digital ID for** in the default position.

4 Finally, make a password.

When you click **Finish**, the pop up screen will disappear and your digital ID will be marked on the booking form.
